

PreView® Plus

PreView Plus provides operators with a heavy duty, all-in-one safety solution. By integrating a camera and monitor with PRECO's radar sensors, operators have a single, comprehensive solution for active blind spot monitoring. PreView Plus supports up to four cameras and multiple sensors for 360° blind spot coverage.

The PreView Plus is built on over 70 years of expertise in blind spot solutions engineering and manufacturing

Our mission is to help keep fleet drivers, workers on the ground, and the public free from harm.

COMPREHENSIVE

PreView Plus combines the benefits of visual awareness with the proven results of our radar sensors, giving your fleet an unbeatable blind spot monitoring solution.

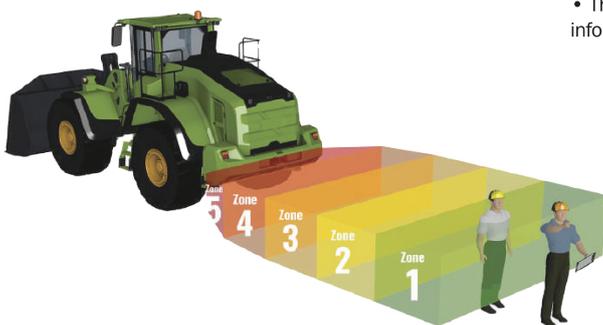

360° COVERAGE

For many companies, eliminating equipment blind spots is a top priority. With the ability to support up to four cameras and 24 sensors, PreView Plus can provide near 360° blind spot coverage.

FEATURE RICH

When you have a multiple sensor/-camera configuration, the monitor will show directional indicators that point to the location of a detected object or person and automatically switch camera views.

HOW IT WORKS

- PreView Radar identifies and reports any objects detected within the detection zone while the cameras provide visual clarification.
- The monitor's color coded indicator and audible alert give the operator an active warning and proximity information.
